Utilizing FSI's performance proven D-700C Hand Hydraulic Riveter Tool with Vari-Max™ control, the D-700-HL Rivetless Nut Plate Installation Tool Kit provides the user a unique, single-action installation capability. The tool is easily adjustable for fastener sleeve length and material thickness. The D-700-HL tool has a built-in pressure control valve to regulate the pull force to insure proper installation. This kit includes the most popular sizes, 8-32, 10-32 and 1/4-28 thread size with the 100° flaring anvils. The D-700-365HL was recently specified by Hill Air Force Base for use in the F-16 Falcon Star modification program. Field serviceable and weighing in at only 33 oz., the D-700-HL tool minimizes wrist effort while providing a reliable and long service life. For ordering information consult you local FSI representative or visit our website at www.fsirivet.com.
